

Fabric storage bins

Specification reference & RFQ worksheet

Three configurations from a produced home-storage project. Use the references below to identify a style, then state any changes in your inquiry. This sheet is not a quotation or a test report.

Configuration	Assembled external size	Construction / packing reference
Lidded storage box	40 × 50 × 25 cm	Attached lid; clear PVC front window. CPP retail bag, hanging hook and printed insert. 12 pieces per carton.
Open-top fabric cube	30 × 30 × 30 cm	Front fabric handle and clear PVC label window. CPP retail bag, hanging hook and printed insert. 24 pieces per carton.
16-compartment organizer	28 × 28 × 10 cm	16 compartments; bottom zipper with one slider. Confirm retail pack and carton arrangement for the order.

Shared specification: 80 gsm polypropylene (PP) non-woven fabric with 2 mm cardboard support. Dimensions above are assembled external length × width × height. Usable internal space and compartment dimensions need separate measurement.

Order conditions: 500 pieces per style for these configurations. Mixed colors are allowed within the same style; list the color quantities for confirmation. Changed materials, structures or packaging need a separate quotation. Carton counts are packing references, not order minimums.

Complete these fields for your inquiry

Selected style / changes	_____
Quantity by color; piece or set	_____
Shelf opening / intended contents	_____
Logo and retail packaging	_____
Destination / required delivery	_____

Agree before sample approval

Confirm internal dimensions, opening and access with the intended contents. Record the measurement method and tolerances, material and board specification, artwork version and packing plan. Agree any load or cleaning tests before making performance claims. Confirm final carton dimensions, weights and any partial-carton arrangement.
